Abuja, FCT

Summary

Hey, there! I'm a passionate and innovative front-end developer with a keen eye for design and a commitment to crafting engaging and responsive user interfaces.

Experience

Heal Hub Center

Freelance Gig • Remote

10/2023 - Present

- As the only front-end developer at Heal Hub Center, I played a key role in the development and still play a role in the maintenance of the company's website, which serves as a platform for booking free therapy consultations and shopping for the CEO's launched book and other products.
 - The website is built using React for the front end, Tailwind CSS for styling, and Firebase for backend services, user authentication, and payment processing.
 - Led the development of the Heal Hub Center website from concept to production, ensuring a responsive and user-friendly experience.
 - Utilized React and Tailwind CSS to create a modern and visually appealing user interface.
 - Implemented Firebase Authentication to secure user accounts, ensuring a seamless and secure login and registration process for users.
 - Developed a sophisticated appointment booking system that allows users to schedule free therapy consultations through an intuitive and easy-to-use interface.
 - Integrated a payment gateway (Pay stack) to facilitate online purchases, allowing users to buy customer books and other products directly from the website.
 - Created interactive forms for users to file complaints or provide feedback, improving communication channels between users and the Heal Hub Center team.
 - Continuously working on enhancing the website's features, including expanding product offerings and improving the overall user experience.
-

Skills

HTML5, CSS, HTML, Tailwind, JavaScript, ReactJS, Time management, Communication skills, Teamwork

Education

Physiology

University of Ilorin • Ilorin, Kwara

10/2023

Project
